

MEM Margin Leakage Review

Finance review identified recurring unplanned cost leakage on event jobs.

Emergency vendor purchases averaged RM 1,800 per flagged event in March.

Average overtime payout for setup and teardown crews increased 22% versus prior month.

Three completed jobs showed lower-than-expected gross margin after same-day sourcing and extended labour hours.

Two overdue client accounts remain above 60 days, affecting cash recovery timing.

Management concern: pricing assumptions may not fully capture setup complexity and contingency cost.
